

Cisco Certified Network Professional (CCNP)

Description

If you possess a valid CCNA certificate (Cisco Certified Network Associate), and your desire is to expand your professional options, a CCNP certificate (Cisco Certified Network Professional) will allow you to operate Local (LAN), and Wide Area Networks (WAN) and install, configure and dial access services. Using multilayer switching technologies, you will be able to build networks and learn how to diagnose and troubleshoot network problems.

- Master technologies like Wi-Fi, Voice Over IP, & Home Technology Integration
- Monitor the information superhighway & optimize networks for maximum performance
- Become an expert at how information moves over the Internet

College Credit

College credit may be available through TCC, RSU, or OSU-Institute of Technology. For more details call the college relations office at 918-828-5205. All college credit is awarded by the college/university.
